

0x013H

Security Engineer · DFIR · Blue Team · SOC Analyst — Jakarta, ID · UTC+7 — 0x013h@gmail.com · github.com/pepbritisnasetiawan · linkedin.com/in/pepbri-tisna-setiawan

Professional Summary — SOC Tier 1 → DFIR Lead (40k endpoints, financial). Static-before-dynamic, telemetry-before-testimony. 28 case files (HTB Sherlock + SAT-TNI IR + C4 audits), 31 detections (FP <0.4%), 120+ incidents, 6 certs. Evidence-driven, UTC-normalized, peer-review ready.

Experience

2025 — Present — Senior Security Engineer · DFIR Lead — PT. Cyber Defense Indonesia, Jakarta

Leads IR for 40k-endpoint financial estate; owns Sigma/YARA backlog; cut MTTR 38% via NIST 800-61. Cases: Black Vault (3-domain AD, \$MFT/EVTX/Chisel 72h), Baggage 10/10 ShellBags/UserAssist, Dark Entry (disk+mem+pcap). Mentors Tier2-3, 4 gates settlement reviews.

2023 — 2025 — SOC Analyst Tier 2–3 — PT. Global Security Solutions

Escalation point for EDR/SIEM; built KAPE/Velociraptor triage, Plaso timeline, 31 detections shipped. Cases: Living-off-the-Land Radar (certutil/mshta), Beacon Hunt (jitter analysis), Golden Trap (LNK Sliver). FP 0.4% after tuning.

2021 — 2023 — SOC Analyst Tier 1 — PT. Secure Network

Alert triage, phishing (resume.docm Empire), first full-scope IR — UltraVNC Sysmon 169 events, 12 C2 sinkholed. Built TheHive/MISP playbooks, SLA 15min triage.

Skills Matrix

Forensics	Volatility 3, KAPE, Plaso, Autopsy, Velociraptor, \$MFT/USN/Journal, EVTX (python-evtx), Amcache, Registry (UserAssist ROT13, BagM)
Detection	Sigma, YARA, Suricata, Elastic SIEM, Splunk SPL, KQL, Wazuh, MITRE ATT&CK, Atomic Red Team
RE & Tooling	Ghidra, IDA Pro, x64dbg, PE-bear, FLOSS, Capstone, pefile, Python, Bash/PowerShell, Foundry, Halmos, Slither

Selected Cases — DFIR Reports (28 total, 14 on portfolio)

Black Vault (DFIR, Lead) — Ransomware 3-domain AD — \$MFT + EVTX 4624/4672 + Sysmon EID1 → RDP 203.0.113.45, Chisel 10.0.0.5:8000, 4720+4728 AD dominance, 72h to root cause, 14 hosts, IOC sweep.

Baggage (HTB 10/10) — KAPE RegistryHivesUser — RecentDocs 1.zip → everything.exe 07:26:57 → OT Station 3 VPN 07:31:05 → \\Prod-ns-2\prodshare\Construction 2027 → a.zip 07:34:30 — ShellBags/UserAssist cross-validated.

Backdoor UltraVNC (SAT-TNI) — Sysmon EID 1/11/22 169 events — Preventivo24.02.14.exe.exe SHA256 0CB44C... via explorer.exe, Dropbox 162.125.81.15, dummy www.example.com 93.184.216.34 — python-evtx parsers.

Monetrix PM (C4 H-01) — Hyperliquid 0x80F double-count — totalBackingSigned 2x, phantom \$500k on \$1.5M, 4-gate settlement PoC, fix single 0x80F + HLP separate — Foundry Halmos.

Golden Trap (SAT-TNI) — LNK 2025-GiveAways.lnk → C:\Temp\svch0st.exe → Yandex 24.4.5.498 CVE-2024-6473 → wldp.dll a1a17e 11s sleep Global\YandaExeMutex → Sliver 18.192.12.126:8888 — Capstone RE.

Certifications & Education

GCFA (2025) · GCIH (2024) · BTL1 (2023) · eCDFP (2024) · CKS (2025) · GREM in progress (2026) — SANS/GIAC, INE, CNCF. Continuous: HTB Sherlock (10/10), SAT-TNI IR (6 ops), Code4rena audits.

Portfolio & Contact

Portfolio: <https://pepbritisnasetiawan.github.io/porto-BT/> — 28 case files, 16 pages, evidence-driven, UTC-normalized, MITRE-mapped. Custom: <https://porto-bt.pepbritisnasetiawan.dev> (pending DNS). Source: github.com/pepbritisnasetiawan/porto-BT — Astro, zero trackers.

Contact: 0x013h@gmail.com (IR in subject, routed first) — github.com/pepbritisnasetiawan — linkedin.com/in/pepbri-tisna-setiawan — Jakarta, remote-friendly — PGP on request — References on request.

Appendix — IOCs, Timeline & Recommendations (Page 2)

Representative IOCs (sample, full on request):

File: 1.zip | everything.exe | Preventivo24.02.14.exe.exe SHA256
0CB44C4F8273750FA40497FCA81E850F73927E70B13C8F80CDCFEE9D1478E6F3 · C2: 162.125.81.15:443 (Dropbox),
93.184.216.34:80 (dummy www.example.com), 18.192.12.126:8888 (Sliver), 185.10.20.5:443 (Stonks) · Host:
PROD-WORKSTATIO SID S-1-5-21-568863175-1002 (steve) · Registry: NTUSER.DAT RecentDocs / UsrClass.dat BagMRU
LastWrite 07:31:05 UTC · E01/AFF4 memdump.lime EVTX SHA256 9f4c...3a1e

UTC Timeline (sample, HTB Baggage + UltraVNC):

07:26:57 UTC — UserAssist (ROT13) → everything.exe execution from %TEMP%\Temp1_Everything-1.4.1.1028.x64.zip (T1083)
07:31:05 UTC — UsrClass.dat BagMRU 1\1\2 LastWrite → OT Station 3 internal VPN + \\Prod-ns-2\prodshare\Construction 2027 (T1083)
07:34:02 UTC — RecentDocs .zip + \$MFT → Pictures\ staging → a.zip (T1005)
03:41:56 UTC — Sysmon EID1 Preventivo24.02.14.exe.exe via explorer.exe, EID22 DNS www.example.com, EID3 93.184.216.34:80 (T1204/T1036)

Recommendations (sample):

1. Enforce AppLocker/WDAC for %TEMP% execution (block everything.exe sideload).
2. Centralize Sysmon EID 1/11/22 to SIEM 30d retention; alert on double .exe.
3. Isolate Prod-ns-2 share tiered access + DLP on Construction 2027.
4. For audits: single 0x80F read + HLP separate; Halmos heartbeat >3600 revert.

Full Reports — 28 cases, each with executive summary, scope & constraints, ATT&CK;/CWE, zero-knowledge playbook, IOCs, and chain-of-custody hashes — available at portfolio /cases/* and on request via IR email. All findings cross-validated across ≥2 sources, UTC-normalized via Plaso.
